Elvis Nuno

Director of NOC / SOC & AI Operations | Data Center & AI Infrastructure Operations Leader

Aurora, Colorado | publicprofileresumec.profound075@slmail.me | Portfolio | linkedin.com/in/elvis-nuno-5635914 | github.com/enuno

PROFESSIONAL SUMMARY

Operations leader with 20+ years running network, systems, and infrastructure operations across carrier-scale telecom, ISP, cloud, and data center environments. Built and led NOC teams, owned 24/7 incident response and escalation, and integrated multi-network operations with minimal downtime. Now applying that foundation to AI infrastructure: AIOps/LLMOps, observability, agent governance, and zero-trust security for GPU/compute and edge data center workloads. Hands-on depth in BGP, Linux, and Kubernetes with director-level ownership of SLAs, runbooks, and teams.

CORE COMPETENCIES

- NOC/SOC Leadership & 24/7 Operations
- Data Center & Edge Infrastructure
- Fiber WAN, BGP/OSPF & ISP Operations
- Incident, Problem & Change Management
- Zero-Trust & Security Monitoring
- Kubernetes, Cloud & Distributed Systems
- AIOps, LLMOps & Observability
- SLA/SLO Design & Runbook Automation
- Team Building, Hiring & Mentoring

PROFESSIONAL EXPERIENCE

Lead Architect — *Ryno Crypto Services, LLC — United States* Mar 2025 – Present

- Own infrastructure and operations strategy for TerraHash Stack, an AI-driven, renewable-powered Bitcoin mining platform running on multi-cluster Kubernetes.
- Built the NoesisPraxis multi-agent operations platform (Hermes Agent, OpenClaw, MemPalace, Honcho, MCP/A2A registries) for autonomous monitoring, triage, and remediation workflows.
- Set AIOps/LLMOps roadmap: model serving, evaluation pipelines, observability (OpenTelemetry), agent-tool governance, and Tirith guardrails with human-in-the-loop approval gates.

Contractor / Freelance — Network Engineering & Operations — *ServerDomes — Edge Data Centers* 2025 – Present

- Design fiber WAN and data center network architecture for edge data centers co-located with renewable-powered compute facilities.

Director of Network Operations — *Centric Internet Services — Missoula, MT* Jan 2024 – Aug 2024

- Led NOC operations and the integration of two distinct ISP networks, consolidating routing, monitoring, and support with minimal customer downtime.

President, Co-Founder, Head of Operations — *Pacific NW Rural Broadband Alliance — Missoula, MT* Nov 2019 – Jun 2024

- Engineered, deployed, and operated community-owned ISPs in underserved rural Montana; owned network operations, vendor management, and field teams.
- Launched the Missoula Valley Internet Co-op network (KPAX News feature).

Lead DevOps Engineer – Cloud Services — *goMoxie — Bellevue, WA* Jun 2016 – Dec 2016

Senior DevOps Engineer — *McGraw-Hill Education — Seattle, WA* Jun 2015 – Mar 2016

Senior Linux Systems Automation Engineer — *CDK Global — Seattle, WA* Oct 2014 – Jun 2015

Senior Linux Systems Engineer — *Salesforce — San Francisco, CA* Feb 2014 – Oct 2014

Lead Network Operations Engineer / DevOps Release Manager — *Sprint / Clearwire — Kirkland, WA* Dec 2006 – Oct 2013

- Carrier-scale NOC operations for a national 4G wireless network: 24/7 monitoring, escalation, outage response, and release management across core network and Linux platforms.

OPEN SOURCE & COMMUNITY PROJECTS

MISJustice Alliance — Lead Coordinating Member & Core Developer Jun 2025 – Present

- Anonymous legal-advocacy collective built on Zero-Human-Company principles: agentic research pipelines with human-in-the-loop gates, zero-trust security, PII filtering, and tamper-evident decentralized records. Includes the YWCA of Missoula case archive (2015–2025), structured on GitBook with automated GitHub sync.
- **UniFi MCP Server** — MCP server exposing the UniFi Network Controller API to AI agents for network ops automation. Python, FastMCP, Redis, Docker, 105+ unit tests.
- **Noesis Agent Stack** — Production multi-agent architecture: Hermes Agent supervisor with OpenClaw workers for research and background loops.

TECHNICAL SKILLS

Operations & Observability: OpenTelemetry, LangSmith, SNMP, MLflow/W&B, incident/on-call workflows, runbook automation
AI/ML & AIOps: vLLM, llama.cpp, SGLang, RAG, vector DBs (Qdrant, Chroma, pgvector), LLM eval (promptfoo, lm-eval), guardrails (Llama Guard, NeMo); agents: Hermes Agent, OpenClaw, LangGraph, CrewAI, MCP, A2A
Networking: BGP, OSPF, VRRP, IPsec/WireGuard/OpenVPN, DNS, SSL/TLS, fiber/WISP
Systems, Cloud & IaC: Linux/UNIX, AWS, Azure, OpenStack, VMware, Proxmox, Docker, Kubernetes, Terraform, Ansible, Puppet, Jenkins, GitOps; Python, Bash, Go, TypeScript, SQL
Security: Zero-trust architecture, mTLS, Tailscale ACLs, YubiKey, Bitwarden Secrets Manager, Tirith MCP

EDUCATION & MEDIA

The University of Montana (2004–2005), OS X Systems Administrator | Bridging the Digital Divide – DePIN for community ISPs | Nostr tech publications
